About Course

9 in1course

PROJECTS

Facility to undergo various Hands-on Projects for Practical learning of the Course

PLACEMENT

100% Placement Assistance for 1-Year, post successful completion

E-LEARNING ACCESS

With abundant tools and techniques, video content, assessments, and more

HACKATHONS

Free Access to Hackathons and Competitions

TRAINING

200 hrs of Live Online / Interactive Classroom Sessions

INTERNSHIP

Internship Assistance to gain practical experience of the learnings

CERTIFICATION

Distinguish your profile with the Certification

BOOTCAMPS

Regular Bootcamps spread over the next 12 months

MEMBERSHIP

Get 1-Year Gold Membership of AchieversIT for the Certified Python Django

Key Features

Qualified and Experienced Trainers

Our trainers are SMEs (Subject Matter Experts) who deliver realtime experience to the classroom.

State-of-the-Art Facilities

Our institute has modern facilities, including classrooms, labs, and equipment, to facilitate effective learning.

Flexibility and Accessibility

Our flexible schedules (Offline, Online, Hybrid), Convenient location and accessibility

Student Support Services

Our eLearning and LMS portals have strong evidence for students support and progress.

Unlimited Batches

Students can attend unlimited batches for the comfortable learning experience

Comprehensive Curriculum

Our up-to-date curriculum covers relevant topics and skills required in the industry.

Industry-Relevant Training

We provide Practical training, workshops, and capstone projects that improve students practical skills.

Placement Assistance

Our dedicated placement cell provides interview preparation, and resume building that enhances opportunities for internships and job placements

10+ Soft Skills

Access to soft skills Courses to enhance Employability

Course Curriculum

Module 1: Introduction to Languages

- Introduction to Languages
- What is Language?
- Types of languages
- Introduction to Translators
- Python Comments
 - Compiler
 - Interpreter
- What is Scripting Language?
- Types of Script
- Programming Languages v/s Scripting Languages
- Difference between Scripting and Programming languages
- What is programming paradigm?
- Procedural programming paradigm
- Object Oriented Programming paradigm

Module 2: Introduction to Python

- What is Python?
- WHY PYTHON?
- History
- Features – Dynamic, Interpreted, Object oriented, Embeddable, Extensible, Large standard libraries, Free and Open source
- Why Python is General Language?
- Limitations of Python
- What is PSF?
- Python implementations
- Python applications
- Python versions
- PYTHON IN REALTIME INDUSTRY
- Difference between Python 2.x and 3.x
- Difference between Python 3.10 and 3.11
- Software Development Architectures

Module 3: Python Software's

- Python Distributions
- Download & Python Installation Process in Windows, Unix, Linux and Mac
- Online Python IDLE
- Python Real-time IDEs like Spyder, Jupyter Note Book, PyCharm, Rodeo, Visual Studio Code, ATOM, PyDevetc

Module 4: Python Language Fundamentals

- Python Implementation Alternatives/Flavors
- Keywords
- Identifiers
- Constants / Literals
- Data types
- Python VS JAVA
- Python Syntax

Module 5: Python Variables

- bytes Data Type
- byte array
- String Formatting in Python
- Math, Random, Secrets Modules
- Introduction
- Initialization of variables
- Local variables
- Global variables
- ‘global’ keyword
- Input and Output operations
- Data conversion functions – int(), float(), complex(), str(), chr(), ord()

Module 6:-Operators

- Arithmetic Operators
- Comparison Operators
- Python Assignment Operators
- Logical Operators
- Bitwise Operators
- Shift operators
- Membership Operators
- Identity Operators
- Ternary Operator
- Operator precedence
- Difference between “is” vs “==”

Module 7: Input & Output Operators

- Print
- Input
- Command-line arguments

Module 8: Control Statements

- Conditional control statements
- If
- If-else
- If-elif-else
- Nested-if
- Loop control statements
- for
- while
- Nested loops
- Branching statements
- Break
- Continue
- Pass
- Return
- Case studies

Module 9: Data Structures or Collections

- Introduction
- Importance of Data structures
- Applications of Data structures
- Types of Collections
- Sequence
- Strings, List, Tuple, range
- Non sequence
- Set, Frozen set, Dictionary
- Strings
- What is string
- Representation of Strings
- Processing elements using indexing
- Processing elements using Iterators
- Manipulation of String using Indexing and Slicing
- String operators
- Methods of String object
- String Formatting
- String functions
- String Immutability
- Case studies

Module 10: List Collection

- What is List
- Need of List collection
- Different ways of creating List
- List comprehension
- List indices
- Processing elements of List through Indexing and Slicing
- List object methods
- List is Mutable
- Mutable and Immutable elements of List
- Nested Lists
- List_of_lists
- Hardcopy, shallowCopy and DeepCopy
- zip() in Python
- How to unzip?
- Python Arrays:
- Case studies

Module 11: Tuple Collection

- What is tuple?
- Different ways of creating Tuple
- Method of Tuple object
- Tuple is Immutable
- Mutable and Immutable elements of Tuple
- Process tuple through Indexing and Slicing
- List v/s Tuple
- Case studies

Module 12: Set Collection

- What is set?
- Different ways of creating set
- Difference between list and set
- Iteration Over Sets
- Accessing elements of set
- Python Set Methods
- Python Set Operations
- Union of sets
- functions and methods of set
- Python Frozen set

Module 13: Dictionary Collection

- What is dictionary?
- Difference between list, set and dictionary
- How to create a dictionary?
- PYTHON HASHING?
- Accessing values of dictionary
- Python Dictionary Methods
- Copying dictionary
- Updating Dictionary
- Reading keys from Dictionary
- Reading values from Dictionary
- Reading items from Dictionary
- Delete Keys from the dictionary
- Sorting the Dictionary
- Python Dictionary Functions and methods
- Dictionary comprehension

Module 14: Functions

- What is Function?
- Advantages of functions
- Syntax and Writing function
- Calling or Invoking function
- Classification of Functions
- No arguments and No return values
- With arguments and No return values
- With arguments and With return values
- No arguments and With return values
- Recursion
- Python argument type functions :
- Default argument functions
- Required(Positional) arguments function
- Keyword arguments function
- Variable arguments functions
- 'pass' keyword in functions
- Lambda functions/Anonymous functions
- map()
- filter()
- reduce()
- Nested functions

- Non local variables, global variables
- Closures
- Decorators
- Generators
- Iterators
- Monkey patching

Advanced Python

Module 15: Python Modules

- Importance of modular programming
- What is module
- Types of Modules – Pre defined, User defined.
- User defined modules creation
- Functions based modules
- Class based modules
- Connecting modules
- Import module
- From ... import
- Module alias / Renaming module
- Built In properties of module

Module 16: Packages

- Organizing python project into packages
- Types of packages – pre defined, user defined.
- Package v/s Folder
- py file
- Importing package
- PIP
- Introduction to PIP
- Installing PIP
- Installing Python packages
- Un installing Python packages

Module 17: Object Oriented Python

- Procedural v/s Object oriented programming
- Principles of OOP – Encapsulation , Abstraction (Data Hiding)
- Classes and Objects
- How to define class in python
- Types of variables – instance variables, class variables.
- Types of methods – instance methods, class method, static method

- Object initialization
- 'self' reference variable
- 'cls' reference variable
- Access modifiers – private(__), protected(__), public
- AT property class
- Property() object
- Creating object properties using setaltr, getaltr functions
- Encapsulation(Data Binding)
- What is polymorphism?
- Overriding
- i) Method overriding
- ii) Constructor overriding
- Overloading
- i) Method Overloading
- ii) Constructor Overloading
- Operator Overloading
- Class re-usability
- Composition
- Aggregation
- Inheritance – single , multi level, multiple, hierarchical and hybrid inheritance and Diamond inheritance
- Constructors in inheritance
- Object class
- super()
- Runtime polymorphism
- Method overriding
- Method resolution order(MRO)
- Method overriding in Multiple inheritance and Hybrid Inheritance
- Duck typing
- Concrete Methods in Abstract Base Classes
- Difference between Abstraction & Encapsulation
- Inner classes
- Introduction
- Writing inner class
- Accessing class level members of inner class
- Accessing object level members of inner class

Module 18: Exception Handling & Types of Errors

- What is Exception?
- Why exception handling?
- Syntax error v/s Runtime error
- Exception codes – AttributeError, ValueError, IndexError, TypeError...
- Handling exception – try except block
- Try with multi except
- Handling multiple exceptions with single except block
- Finally block
- Try-except-finally
- Try with finally
- Case study of finally block
- Raise keyword
- Custom exceptions / User defined exceptions
- Need to Custom exceptions
- Case studies

Module 19: Regular expressions

- Understanding regular expressions
- String v/s Regular expression string
- "re" module functions
- Match()
- Search()
- Split()
- Findall()
- Compile()
- Sub()
- Subn()
- Expressions using operators and symbols
- Simple character matches
- Special characters
- Character classes
- Mobile number extraction
- Mail extraction
- Different Mail ID patterns
- Data extraction
- Password extraction
- Case study

Module 20: File & Directory handling

- Introduction to files
- Opening file
- File modes
- Reading data from file
- Writing data into file
- Appending data into file
- Line count in File
- CSV module
- Creating CSV file
- Reading from CSV file
- Writing into CSV file
- Object serialization – pickle module
- XML parsing
- JSON parsing

Module 21: Python Logging

- Logging Levels
- implement Logging
- Configure Log File in over writing Mode
- Timestamp in the Log Messages
- Python Program Exceptions to the Log File
- Requirement of Our Own Customized Logger
- Features of Customized Logger

Module 22: Date & Time module

- How to use Date & Date Time class
- How to use Time Delta object
- Formatting Date and Time
- Calendar module
- Text calendar
- HTML calendar

Module 23: OS module

- Shell script commands
- Various OS operations in Python
- Python file system shell methods
- Creating files and directories
- Removing files and directories
- Shutdown and Restart system

Module 24: Multi-threading & Multi Processing

- Introduction
- Multi tasking v/s Multi threading
- Threading module
- Creating thread – inheriting Thread class , Using callable object
- Life cycle of thread
- Single threaded application
- Multi threaded application
- Can we call run() directly?
- Need to start() method
- Sleep()
- Join()
- Synchronization – Lock class – acquire(), release() functions
- Case studies

Module 25: Python Data Base Communications(PDBC)

- Introduction to DBMS applications
- File system v/s DBMS
- Communicating with MySQL
- Python – MySQL connector
- connector module
- connect() method
- Oracle Database
- Install cx_Oracle
- Cursor Object methods
- execute() method
- executeMany() method
- fetchone()
- fetchmany()
- fetchall()
- Static queries v/s Dynamic queries
- Transaction management
- Case studies

Module 26: Tkinter & Turtle

- Introduction to GUI programming
- Tkinter module
- Tk class
- Components / Widgets
- Label , Entry , Button , Combo, Radio

- Types of Layouts
- Handling events
- Widgets properties
- Case studies

DJANGO Curricullam

Module 27: Introduction to Web

- What is WEB?
- Features of WEB?
- Introduction to HTML & HTML5
- Introduction to CSS &CSS3
- Introduction to JAVASCRIPT
- Introduction to Bootstrap
- Creating Basic Web Pages
- Introduction to SCRIPTS

Module 28: Django Web Framework

- What is a Framework
- Introduction to Django
- Django – Design Philosophies
- History of Django
- Django Features
- Environment setup
- Web Server

Module 29: Getting Started with Django

- Creating the first Project
- Integrating the Project to PYCHARM & Other IDEs
- The Project Structure
- Running the in the server
- Setting Up Your Project
- Create and configure Django apps
- Django App Structure
- Configuring App in Project

Module 30 :URLs and Views

- What is URL?
- Define URL patterns
- What is View
- Configure URLs
- Developing different views

Module 32: URL dispatcher

- Django URL Mapping
- Configuring URLconf's
- Django URL Functions
- Path()
- Re_path()
- URL Patterns App Level and Project Level
- Include()

Module 33: Django Templates

- Define Django Template
- Django MVT Pattern
- Django Template Configuration
- render() function
- Django Template Language
- Template Tags or Template Variables
- String interpolation
- What is a context?
- Define ContextProcessor?

Module 34: Working with Static Files

- include Static Files inside Template
- Configuring static files
- Creating Project with static resources
- HTML, CSS, Images

Module 35: DJANGO MODEL

- Define Database?
- Define DBMS, RDBMS?
- What is Model?
- Database Configuration
- How to Check Django Database Connection
- Configuration of MySQL Database
- Defining Django Models
- Django Model Fields
- Field Options
- What is a Migration?
- migrate Command
- Creation of Super User
- Register Model Inside Admin Interface

- Difference between makemigrations and migrate
- Define QuerySet
- The Python Template Engine

Module 36: Django Forms or Model Forms

- What is Model Form?
- Advantages of Django Forms
- Creating Django Forms
- CSRF
- Creating a Login form
- Creating Registration Form

Module 37: Django Form Validation

- What is Validation?
- is_valid()
- Clean Methods
- Creating Project
- What is HTTP?
- Basic Features
- http request methods
- HTTP – URL Encoding

Module 38: Session Management in Django

- Cookies
- What is Cookie?
- Why Cookie?
- Types of Cookies
- Advantages, Limitations
- set_test_cookie():
- test_cookie_worked()
- delete_test_cookie()
- set_cookie()
- get()
- Django Session Framework
- request.session['key']
- request.session.get_expiry_date()

Module 39: Authentication & Authorization

- Define Authentication
- Define Authorization
- Auth System

- Enabling authentication
- Auth system Consists
- Bcrypt & argon2
- Real time example on AA
- Working with Admin

Module 40: Django File Upload

- What is upload
- Creating media_root & url
- How to upload files
- Upload images
- Upload Audio Files
- Upload Video Files

Module 41: Django CRUD Operations

- What is CRUD?
- CREATE
- READ
- UPDATE
- DELETE
- CRUD with Project

Module 42: How to Send Email in a Django

- What is mail system
- Mail Requirements
- send_mail()
- Configuring Mail Settings
- Sending Email
- Other Email Functions

Module 43: Outputting CSV with Django

- What is CSV?
- CSV Using Models
- Creating a Live CSV Project

Module 44: Outputting PDF with Django

- What is PDF?
- Creating a Live PDF Project

Module 45: GIT & Github

- What is git?
- Define Version Control System
- Git Installation
- Git commands
- Define Github
- Pulling and Pushing

Module 46: Introduction to Web Services

- What is Web Service?
- Types of WebServices
- SOAP based WebServices?
- Features and Limitations?

Module 47: Introduction to XML

- What is XML?
- Structure of XML
- Comments, Attributes & Elements
- What is DTD?
- What is Schema?

Module 48: Introduction to REST API(Restful Services)

- What is REST?
- What is API?
- What is JSON?
- HTTP Status Codes?
- HTTP Methods for RESTful Services
- POST
- PUT
- GET
- DELETE

Overview of Project+ Resume

Web Project Implementation

Resume Preparation

Interview Questions

Module Complimentary : 10+ Soft Skills Courses to Enhance Employability

Module 1: Communication Skills

- Verbal Communication
- Written Communication
- Active Listening

Module 2: Time Management

- Prioritization
- Goal Setting
- Planning

Module 3: Teamwork and Collaboration

- Collaboration
- Conflict Resolution
- Flexibility

Module 4: Critical Thinking

- Problem-Solving
- Decision Making
- Analytical Skills

Module 5: Adaptability

- Flexibility
- Resilience

Module 6: Leadership Skills

- Initiative
- Motivation
- Delegation

Module 7: Emotional Intelligence

- Self-Awareness
- Empathy
- Interpersonal Skills

Module 8: Presentation Skills

- Public Speaking
- Visual Communication
- Planning

Module 9: Networking

- Building Relationships
- Networking Skills
- Planning

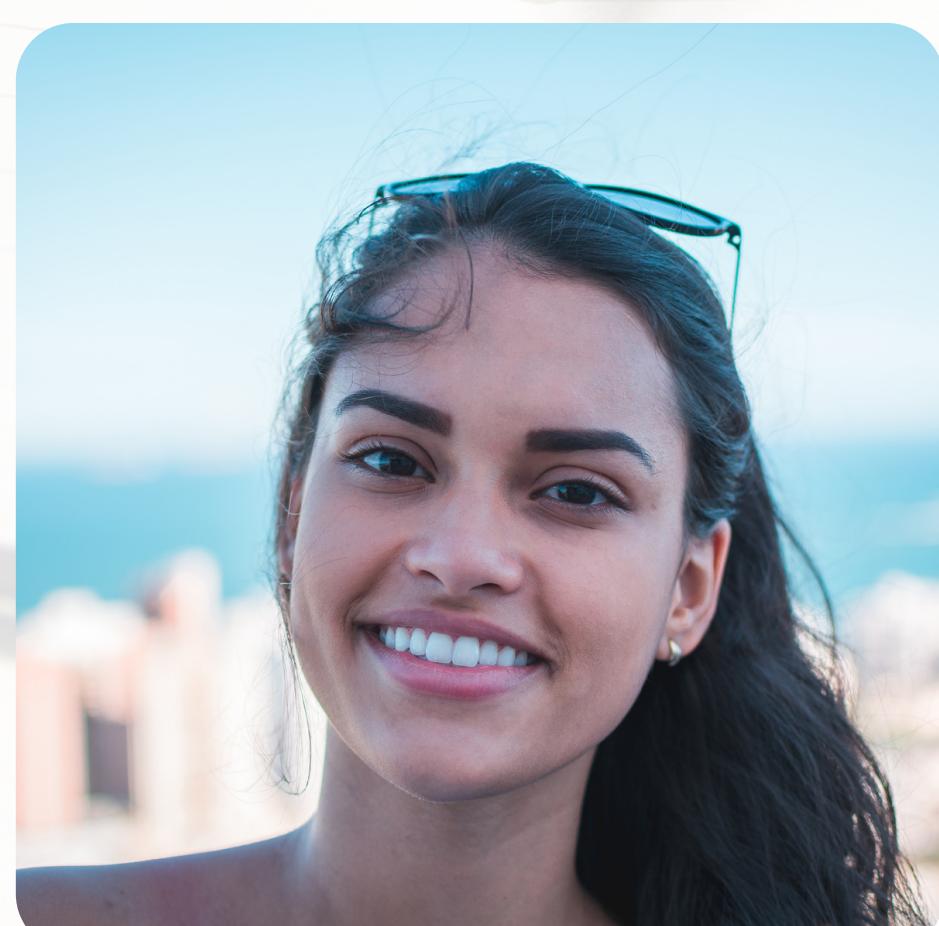

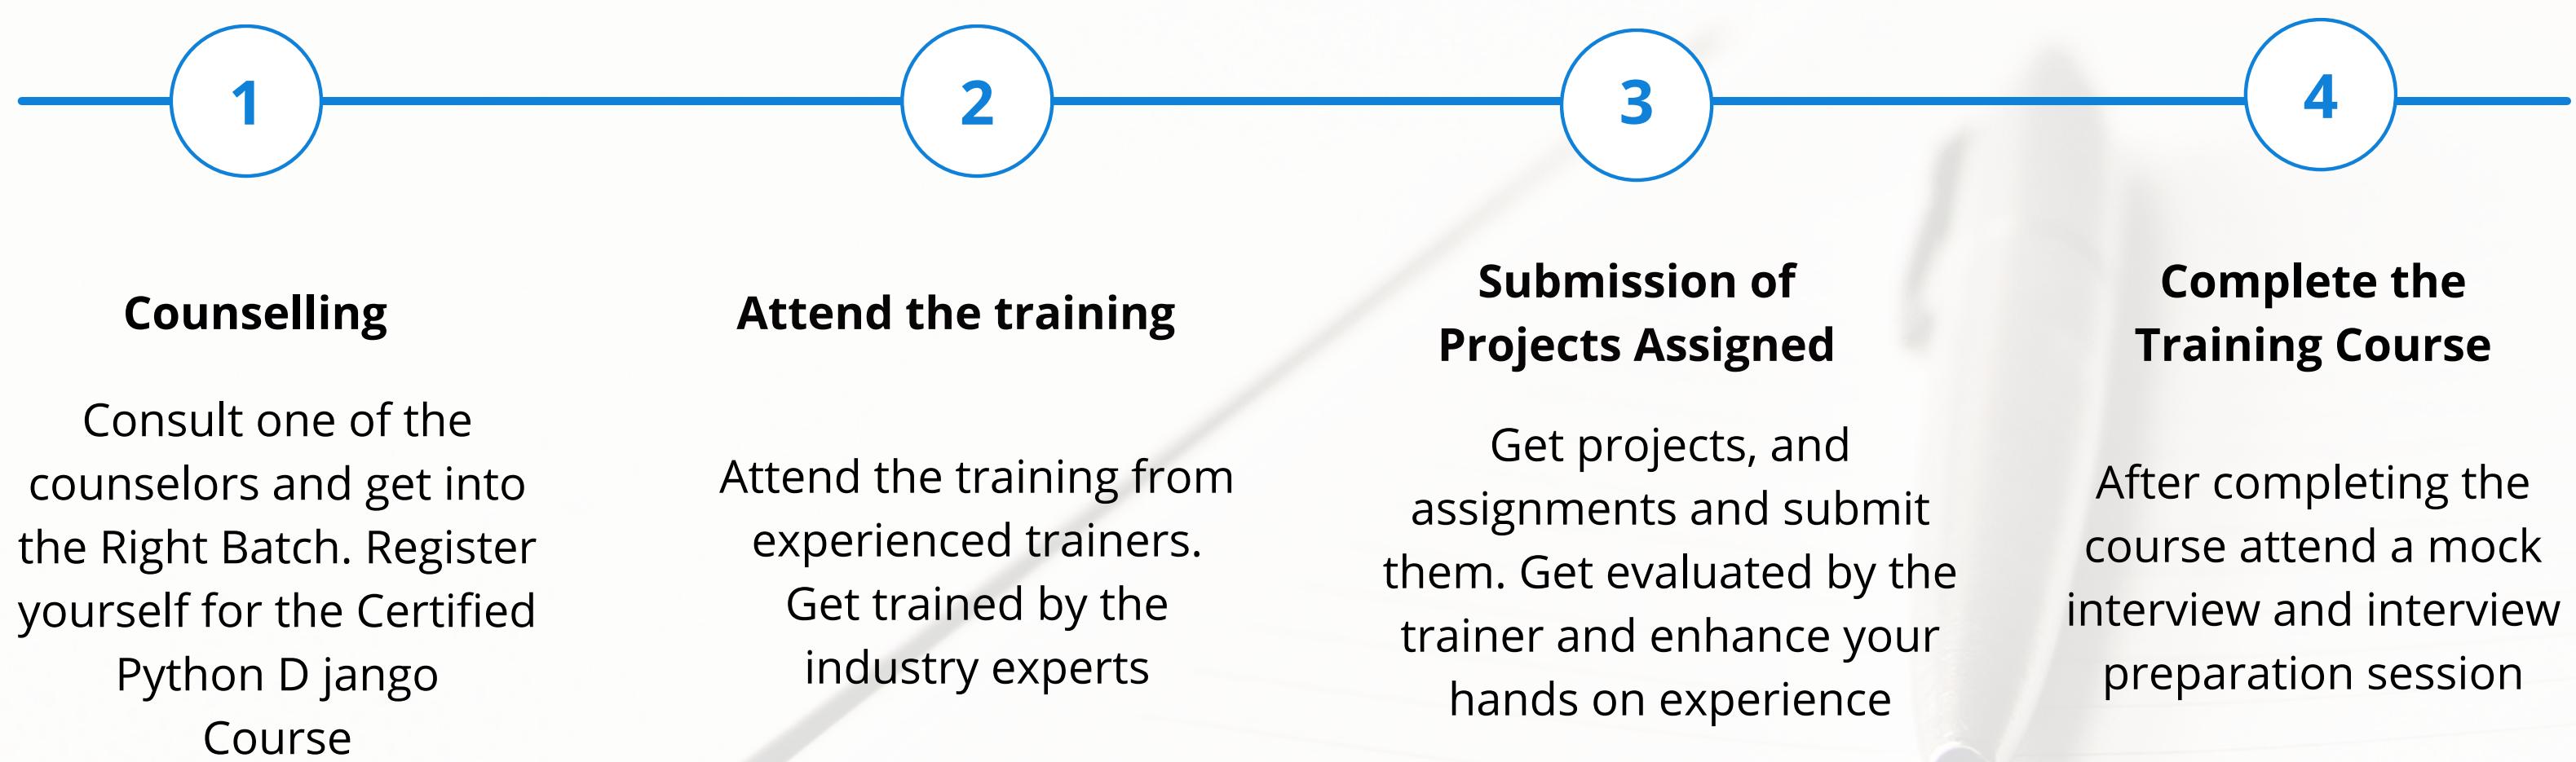

Module 10: Digital Literacy

- Technology Skills - ChatGPT, GenerativeAI, CognitiveAI, and other tools
- Information Literacy - Evaluating and using information from various sources.

AchieversIT Training Methodology

Live Projects	Live Projects are carried out during the training tenure to develop experiential learning for the participants. This helps in better understanding of the concepts and gain in-depth practical insight.
Unique Pedagogy	<u>Uses a mix of techniques aligned to our unique S.O.L.I.D pedagogy.</u> <u>This enables participants to derive focused-action-oriented outcomes from the training</u>
End-to-End Engagement	Participants will be engaged throughout the training through reverse presentations, group activities, brainstorming sessions, and hands-on experience over both statistical and non-statistical tools. Idea is to focus on value creation

Certification Process

Learning Benefits

Broadens your job opportunities, allowing you to explore different roles within the IT sector.

Python equips you to take on roles involving both frontend and backend development, making you a valuable asset for companies looking for versatile developers

Can open doors to roles that involve both web development and data-related tasks

Python makes you a sought-after candidate in the competitive job market

Python makes you well-suited for roles in dynamic and innovative companies

Python developers, especially those with full-stack skills, often command competitive salaries

Flexibility to work remotely, which is an increasingly important consideration in the modern job market

Career Benefits

Fill the void of thousands of untapped **High-Paying Jobs** in Industry with Talent Shortage

Know about the **various opportunities** and scope of learning **Python Development**

Distinguish your profile from peers during **Job Interviews**

Improve CV & LinkedIn Profile with **professional development**

Students Testimonials

Excellent Teaching

I am so grateful for the excellent training I received! The trainers made my learning easy and practical. They helped me understand difficult concepts. I feel confident and ready for whatever comes next. Thank you for the amazing experience. The best part here is 1-1 mentorship after the training provided for me that made to crack many interviews.

Awesome Materials

Thanks to the whole team of AchieversIT for providing the best materials which helped me to crack interviews. I solved most of the interviews by referring to the material given by the AchieversIT team. Thanks a lot for helping me in all the stages of my job hunt. Special thanks to Murali sir for his timely assistance. Even after placement, this team is helping to solve my project issues. I never regret of choosing this place for learning.

Well Supported

A good place to learn Manual and automation testing. Mentors are highly skilled and knowledgeable. I found the best part here at AchieversIT is the whole team is ready to support us whenever we require it. The instructors are well-supported in whole programs. The course concepts that I learned from this institute were so helpful in cracking interviews and helped me solve the problems while working on the projects.

Happy for @Team

I am happy to share my experience with this institute, I enrolled in Python full stack and worked on 3 real-time projects. While working on projects gained a lot of practical experience, and my mentor helped to implement real-time scenarios. The interview preparation team helped me and my friends to prepare for the job. We all enjoyed the services given by Mr Murali and the team. Thanks a lot for training us well appreciated.

Guided Me well

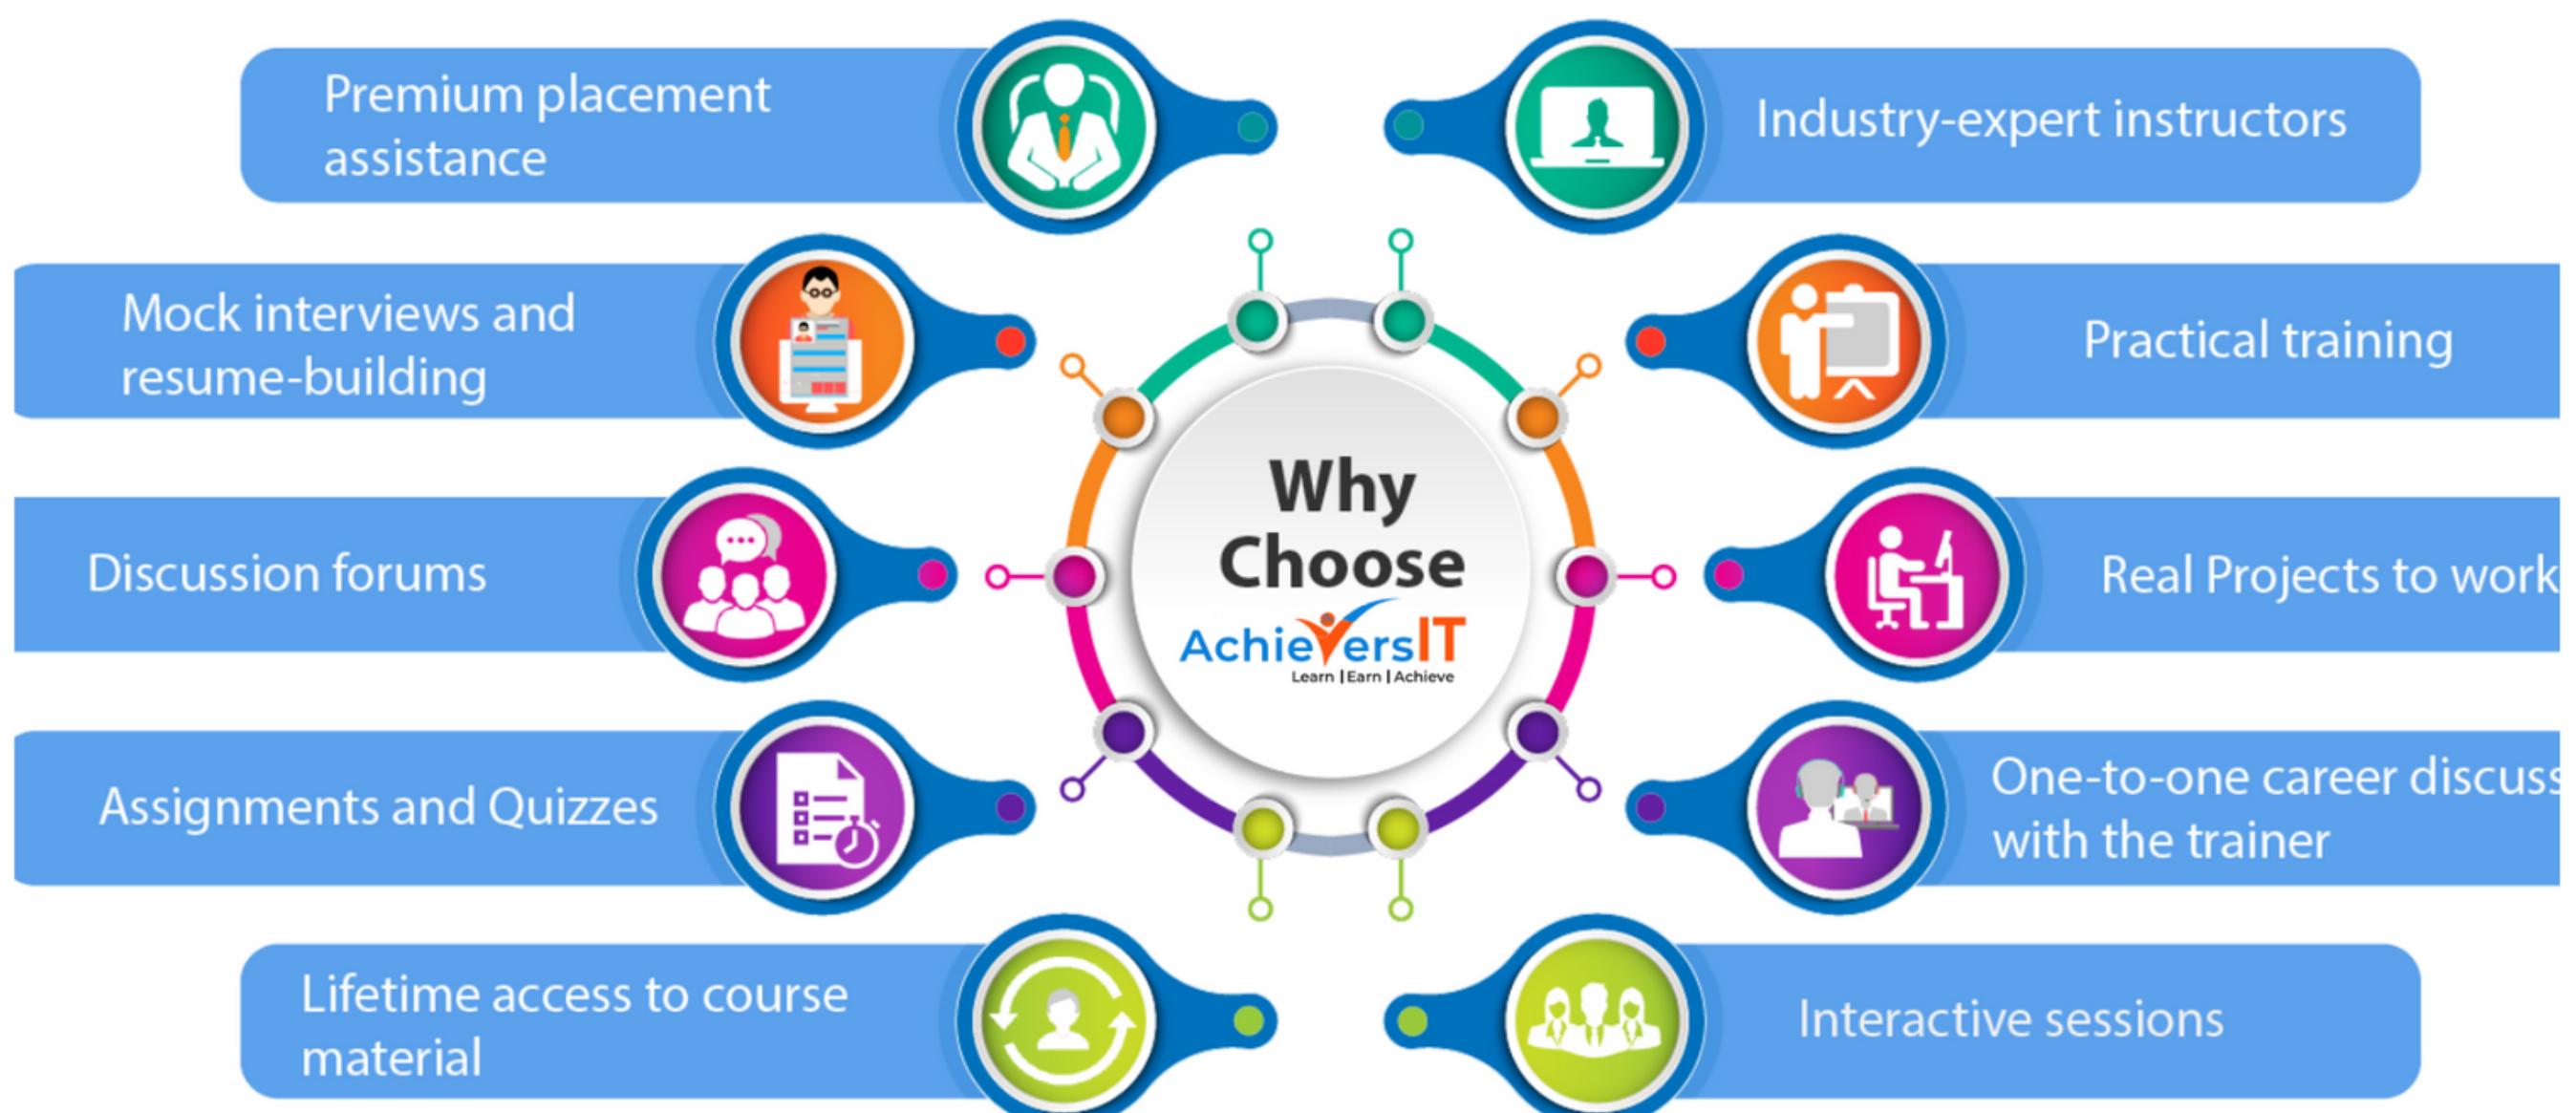

Great Institute to kick start our career in the field of web and UI development. All the trainers are from industry backgrounds and are assigned real-time projects for practical learning. Every day we can interact with the development team and clarify our doubts instantly so that it's easy for us to move to the next step. They help me prepare for the interview even in a recession. Thanks for the placement provided.

Liked their Mentorship

My friend referred me to join for web development with a Manual + automation selenium in AchieversIT BTM. My trainer Jyothish had excellent key skills and a solid IT background. His training was excellent with good interaction. He trained very well with real-time scenarios based on live projects. Murali always gives good suggestions for each student. Thanks a lot for helping to get a job in IT company. Overall experience was very informative and knowledgeable.

why AchieversIT

Job Support at AchieversIT

Our IT On-Job Support mission is to up skill the beginners in IT with the ability to solve their Real-time complex project requirements. We at AchieversIT, assist and render job support services in more than 50+ IT Courses.

If you are one of those, struggling to survive in the job due to lack of technical abilities or those got a new project and stressed about the work assigned then write to us. We put forward our best skilled IT consultant, to guide you in achieving the best result in your work and furnish your deliverables.

What do we promise?

We are here to better solve your work-related complications.

- Our services are reliable and affordable that meets client needs.
- Our consultants are real-time professionals with abundant experience in the IT industry on various skills. They provide complete exposure of your job-related issues.
- We impart knowledge and skills in a practical way and make resource understand the technology workflow.
- Our real-time expert's guidelines help you handle critical situations at the job.
- Our consultants guide you to solve the particular task within a given amount of time.
- We offer students effective tools to achieve success.

★★★★★ 5 days ago **NEW**

AchieversIT is one of the best Training institutes for REACT Front-End course in Bangalore. I took ReactJS course. It is 3 months course. They started with HTML, CSS, Bootstrap, Java script and React. Trainers are good and we can approach them any time for any sort of doubts. For me Murli sir , Siva and Chaitanya helped me through out the course. They will also conduct mock interviews after completing the course.

I recommend AchieversIT institute for React course.

AchieversIT is one of the best Institutes in Bangalore for Web Development.

Murli sir is the head of the Institute. He guides the student very well in what's best for the them and helps in any way possible.

Provides a great environment for all the students.

They have experienced trainers for almost all the technologies such as front-end courses, reactjs, nodejs, and many other courses.

Siva sir, Chaitanya sir trained and helped me for improving my front-end basics.

Hi,

As i was looking for best training institute with placement support, my friend suggested me to join AcheiversIT institute.. BTM,Bangalore. I had joined for React js Course.. I got placed in React js domain... with very good package And my cousin brother also joined this institute for UI Developer Course and he is fresher and a degree graduate .. he also got placed recently.. There are All Experienced trainers available here you can clarify all doubts at that time it's self. And MURALI sir always guided me. The training is purely based on real time projects, That may help you at the time when work on real time work environment. I suggest you guys to join this institute... This is very good institute for learners with Good staff.

Thank you Achiver's IT...Thank you MURALI sir.

Positive: Communication, Professionalism, Quality, Value

I m happy to share my Experience with Achievers IT. Firstly I will thank to Murali sir and Moanoj sir, the way how they teach me with real time examples. When I was in Bangalore, I was searching for React js. Luckily I found Achievers it in BTM Layout. I did a research about it and joined. Coming placement support, they are real good at placement support with good packages.

Positive: Communication, Professionalism, Quality, Value

First of all i would like to thank you murali sir for conducting the classes practically and making students aware of advanced technologies . I came to know about training institute through my friend . It was fun learning new things and working on the Home work which students are asked to do after each session and topic covered.

Positive: Professionalism, Quality

Best institute for freshers and experienced to enhance their skills. Siva sir and Murali sir thought us the best coding and helped us throughout the training period after that...

Planning to join my brother as well for the coaching .

All the best to the team and keep up the good work by teaching students in the best way.

Positive: Communication, Professionalism, Quality, Value

I am exited to share my experience with AchieversIT training institute Bangalore,as i was a mechanical engineering student I was in confusion to choose the right course and also visited many institutions to get the right path but different people suggested different courses,got confused.Finally I met Murali sir at AchieversIT training institute Bangalore then he suggested me ui development with React js course and trained to from basic level to advanced level that's where today I am in software engineer position with good career path. Thank to everyone who supported me during entair journey. Whole team of AchieversIT done a great job.Keep doing the great and special thanks to Murali sir,Siva sir for guiding me all the concepts clearly.

Positive: Professionalism, Quality, Value

As we currently live in the USA, I was looking for a web development course for my wife and I found this online course from AchieversIT. This is an incredible course to lean the web development. Murali is an amazing instructor. He is an out-and-out web development specialist from developer to an architect to a freelancer. He designed the course very systematically that students from non-coding background can also learn it enthusiastically. He starts the course right from the beginning and built it up to advanced. I'd highly recommend this course to anyone who wishes to learn Web Design and Development.

Positive: Quality

I'm very much happy to share my experience with AchieversIT training institute in Bangalore. As I was graduated from mechanical engineering stream and I don't know what to do next. My brother in law suggested me to discuss with Murali sir. Before I met him I had many confusions and doubts. Murali sir helped to understand what is the right for me and trained me on ReactJS and UI development. I must be thankful for him for his support and guidance and also I must be thankful to whole team AchieversIT for their continuous support during training period. Once again thank you Murali sir ❤️.
